

**Contains
dextrose**

Re-hydralab

Oral solution

Quick recovery from dehydration

- ✓ Excellent results in young animals
- ✓ Aids in recovery of homeostasis and stabilises the water and electrolytic balance
- ✓ Aids in overcoming thermal stress

Complete formula with electrolytes and sugars

- ✓ With dextrose
- ✓ Contains sodium & potassium salts
- ✓ High palatability

Convenience of use

- ✓ Several sizes: 1 l and 5l
- ✓ The animals accept it very well
- ✓ Does not precipitate: does not obstruct drinking troughs

LABIANA
always works

Re-hydralab Oral solution

Sodium and potassium, responsables of electrolyte balance

Sodium

- Regulation of blood pressure and of blood volume.

Potassium

- Essential for a correct growth of the organism.
- Intervenes in the production of proteins with its main components which are amino acids.
- Intervenes in the metabolism of carbohydrates.

The addition of dextrose to the electrolyte solution increases the absorption of sodium in the small intestine.

Sodium and potassium

- Regulate the concentration of substances inside and outside the cells.
- Collaborate in the permeability of the membranes.
- Form part of the bones.
- Participate in muscular contraction.
- Intervene in nerve transmission and in the correct functioning of the nerves.

COMPOSITION

Dextrose, sodium chloride, monopotassium phosphate.

Additives per litre:

Flavouring:

Glycine.....38.50 g

Preservatives:

Potassium sorbate (E202) 1.5 g

Tripotassium citrate (E332)0.75 g

Colourants:

Caramel colour (E150d).....0.60 g

Analytical composition:

Sodium34 mg/kg

Potassium.....18.853 mg/kg

Calcium < 0.03 %

Chloride.....4.79 %

Lysine < 0.02 %

Methionine..... < 0.02 %

Crude protein4.11 %

Crude oils and fats.....0.02 %

Crude fibre 0 %

Moisture content: 8 %

INDICATIONS

Prevention and treatment of digestive disorders (diarrhoea) and their convalescence. Stabilisation of water and electrolyte balance.

DOSAGE AND ADMINISTRATION ROUTE

Oral administration, in drinking water.

From 1 to 7 days (3 days if it constitutes the only food).

Calves: 40-50 ml/litre of drinking water. 2 litres/day.

Lambs and kids: 60 ml/litre of drinking water. 0.5-1 litre/day.

Poultry: 1-2 ml/litre of drinking water.

Foals: 50 ml/litre of drinking water. 3 litres/day.

SPECIAL PRECAUTIONS FOR STORAGE

Store in a cool and dry place. Protect it from the light.

Shelf life: 2 years.

PRESENTATIONS

200 ml and 1 litre bottles.

5 litre jug.
